SEC3123: Attacks and Threats Modelling

1st Trimester: 2024/2025

Teamwork Report

Retaj Baaqeel	
Ruba Alotaibi	
Razan Almalki	
Wafaa Alawadhi	

1- The distribution of the work

In this section, mention the distribution of the work between the team. Be honest and feel free to show your tasks individually.

Member	Task(s)
1-Retaj Baaqeel	LINDDUN: Linking, identifying Non-repudiation.
2-Razan Almalki	LINDDUN: Data disclosure, non-compliance·detecting
3- Ruba Alotaibi	STRRIDE: Repudiation, Elevation of privilege, DoS
4- Wafaa Alawadhi	STRRIDE: spoofing, information disclosure, tampering

2- What we learnt

we learned about the data flows and how to categorize it, the advantages that we gain was that now we can deal with data flows in the system , not

just that but we can design a system and define its elements, and the potential threat that could happen on the system, we are now capable of doing all that, and of course team work was helpful in this project, and we think that without team work it would be a lot harder to do. And hopefully with more practice we can work in a large-scale project later.

3- Project difficulties

The main difficulty we faced was dealing with the tool OWASP Threat Dragon, the tool was advanced, and we wished if we studied how to use it or started on it earlier in the semester
